

LION CLASSIC

HIGH-SPEED LASER ENGRAVING OF METALS AND PLASTICS

Developed and manufactured by Lion Lasers in the Netherlands

BENEFITS OF THE LION CLASSIC

The LionClassic Fiber is a versatile high-speed engraving laser. A fine laser beam enables products to be personalised in seconds. A logo, a minuscule data matrix code or a automatic text are created in no time with the supplied software.

The LionClassic Fiber can be used for almost all **metals** as well as many **plastics**.

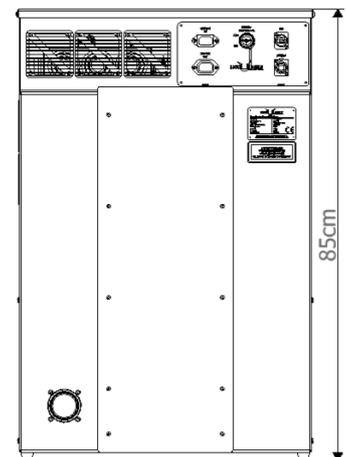

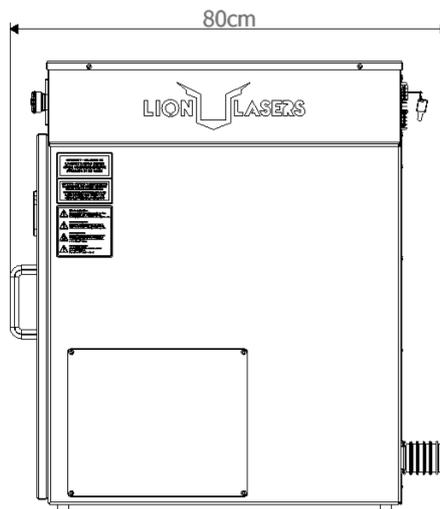

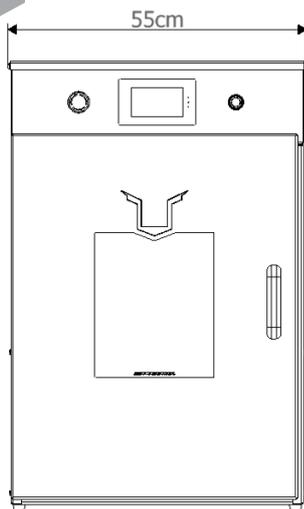

The robust housing with touchscreen has several smart openings to allow for engraving large products. With a choice of different laser sources and many options, Lion Lasers makes this machine suitable for your production process.

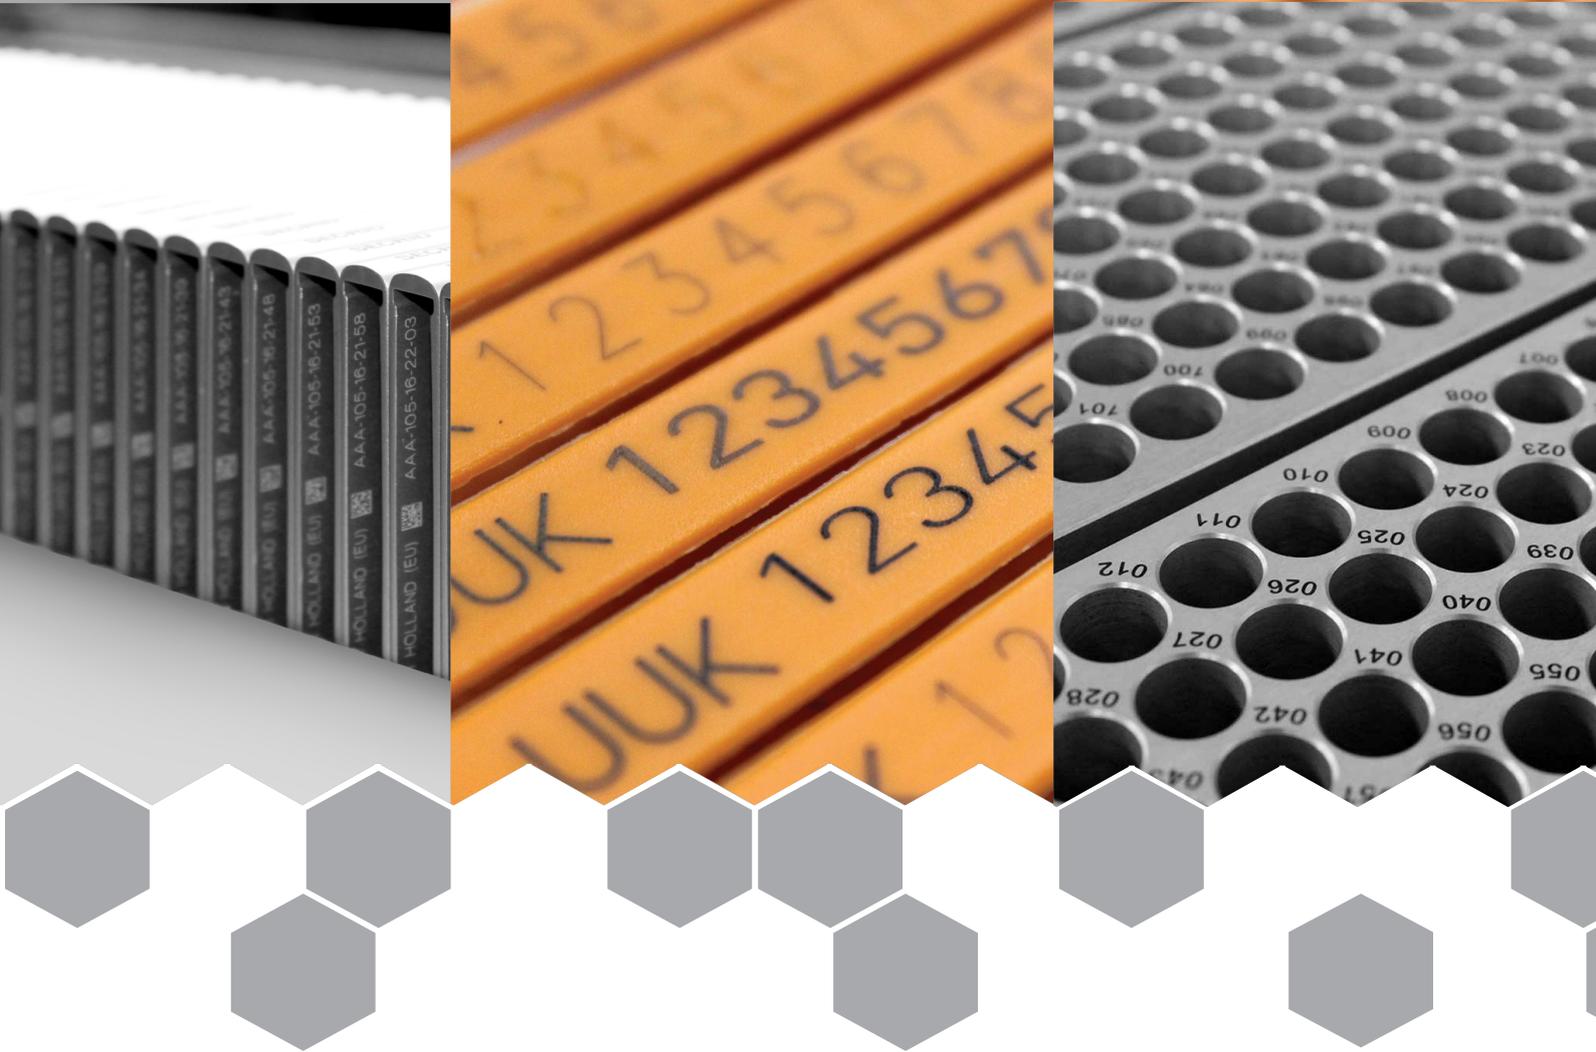

Curious about the possibilities? Get advice and a free product sample.

- ✓ Universal high speed engraving laser
- ✓ Automatic height adjustments
- ✓ User-friendly touch-screen
- ✓ Laser-safe housing
- ✓ Side and bottom product feed possible
- ✓ User-friendly software
- ✓ Various expansion options
- ✓ Designed and built in the Netherlands

WARRANTY AND SERVICE

At Lion Lasers, we are happy to assist you with fast and professional service.

Lion Lasers offers a 5-year warranty on the Lion Classic, in accordance with the terms and conditions of our general terms and conditions of delivery.

We provide on-site or online training during installation. Even if you prefer training at a different time than the installation, we will take care of everything for you. To keep your machine in good condition, we offer annual maintenance through a maintenance contract.

We offer high-level support both remotely and on-site. If we are unable to help you further by telephone, we will be happy to schedule a visit to your location.

Our laser systems are designed and built in the Netherlands. Our service engineers also build the laser systems themselves, giving them the right knowledge and skills. We are proud of this, as proud as a lion!

We are available during office hours.
